

HAH COVID-19 VACCINE POLICY

With the promise that the covid-19 vaccinations will minimize the risks of contracting the virus and thereby reduce the risks of transmission of the virus between HAH volunteers or between volunteers and senior neighbors benefitting from HAH programs, HAH establishes the following policy to be in effect:

Harpowell Aging at Home will comply with all relevant COVID-19 directives and guidance issued by the Maine Centers for Disease Control and Prevention for residents of the state. Individual HAH programs may have more restrictive protocols for their volunteers and senior clients. All HAH participants must still use their discretion when and if to participate in any HAH program at any time. A volunteer's or client's choice not to participate will be recognized without prejudice.
